A Personal Note from Vyvo SocialFi CEO

Dear vLife Community,

This year has marked a defining moment in Vyvo's journey—from bold vision to tangible reality. **Vyvo AI** is moving from beta into real-world use, learning from each of you, growing with your input, and beginning its evolution as your **Life CoPilot**.

But this is just the beginning.

Vyvo AI is not just another smart assistant—it's a responsive, emotionally intelligent partner designed to support you in daily life, in business, and beyond. And thanks to your engagement, it's becoming something truly personal, and truly powerful.

As you flip through this issue of vLife, whether during the convention or months from now, know that everything you read is part of a much larger story—a **shared journey** toward more meaningful technology, deeper connection, and empowered digital ownership.

What excites me most is how far we've come together. This year, **Vyvo AI** reached a powerful new stage—not just as a concept, but as a fully integrated experience inside the new **Vyvo SocialFi App**. For the first time, your Life CoPilot is live, working alongside you in real time—helping you engage, grow, and lead your business with clarity and confidence. It's Vyvo AI at its full potential: guiding conversations, tracking momentum, and offering smart, human-like support right when you need it most.

As I look at what we've built together, I feel more than pride—I feel a deep sense of gratitude. Vyvo AI began as a bold idea: to create technology that serves people, not the other way around. This platform is not just made for the people—it's made by the people. Every layer of Vyvo—from the AI product experience to the decentralized GPU infrastructure and even the economic benefits—reflects true user ownership and participation. It's a movement where each member contributes to and benefits from the very fabric of the platform, redefining what it means to belong, to build, and to earn in the digital age.

This isn't just a product. It's a movement. And it only works because of you.

So let this issue be more than a recap. Let it be a **recognition of your role** in something bigger. Because this community isn't just made of early adopters. It's made of architects—people who are shaping the way technology and humanity move forward together.

Let's continue to learn, build, and lead—together.

With deep appreciation,

Alessandro Senatore

Alessandro Senatore
CEO, Vyvo SocialFi

Welcome to vLife Digital

A Letter from Antonio Pagano

Dear Community,

It is with great excitement—and deep purpose—that I welcome you to **vLife Digital**, Vyvo's new platform created to celebrate the voices, stories, and breakthroughs shaping the future of human-centered technology.

In recent years, we've witnessed a profound shift in how people interact with data, devices, and intelligence itself. At Vyvo, we've never seen these as separate elements, but rather as **parts of a unified, living ecosystem**. One where your data becomes your asset, your wearable becomes your guide, and your AI becomes your trusted Life CoPilot.

That's what inspired us to create **vLife Digital**—not just a magazine, and not just a portal. It's a **living hub of stories, experiences, and insights**, built around the pioneers, creators, developers, and everyday users who are driving the decentralized future.

With Vyvo AI redefining personal AI, DataFi unlocking new ownership models, and our expanding ecosystem, vLife Digital becomes a place to **connect, learn, and be inspired**. It's also where you'll meet the people behind the innovation: from researchers and engineers to influencers and early adopters.

vLife Digital is a **home for ideas**, a **stage for global talent**, and a **companion to the Vyvo Generation**.

You'll find deep-dive interviews, thought leadership, community features, and creator spotlights, delivered in short formats, long reads, and immersive digital experiences. We've designed it to be useful, bold, and above all, human.

As we build this together, I invite you to explore, contribute, and make it your own.

Welcome to the revolution.

Welcome to **vLife Digital**.

Ciao For Now,

A handwritten signature in black ink that reads "Antonio Pagano".

“Vyvo” Las Vegas!

A Lifestyle Holiday We Won't Soon Forget

LIFESTYLE HOLIDAY 2025 IN LAS VEGAS LAST JUNE SET A NEW STANDARD FOR WHAT INCENTIVE TRAVEL WITH VYVO CAN BE!

This latest spectacular trip for qualifying Influencers was full of adventure, showstoppers, and so many ways to have fun and connect with others. Numerous jaw-dropping experiences made this a trip of a lifetime!

These experiences included a live show from **Cirque du Soleil**, an excursion to neighboring Arizona for a once-in-a-lifetime visit to the **Grand Canyon**, a **Future Maker meeting** for everyone, and a trip back in time to Old Vegas at the **Retro Royale Glam Gala Night** at Caesars Palace. This was all about glitz, glamour, and timeless style! We awarded prizes to the night's three winners, and luck had nothing to do with it!

★
**1. Best Dressed
Female**
Chizuko Ishida

★
**2. Best Dressed
Male**
Wu, Ping Chen

★
**3. Best Retro Glam
Interpretation**
Lin, Hsiang Yun

We also celebrated our three "Lights, Camera, Las Vegas!" social media contest winners who captured the spirit of the event in true Vyvo style:

1. "Lights, Camera, Las Vegas!" Winner
Nobuhiko Yamamoto

2. "Lights, Camera, Las Vegas!" Winner
Hu, Chuan Chuan

3. "Lights, Camera, Las Vegas!" Winner
Wang, Li Ya

This Lifestyle Holiday involved more qualifiers than any previous Holiday, and many were first-time qualifiers. Five of them shared their experiences and perspective with us.

Cho, Yi Yang

“The most impactful part of Lifestyle Holiday was visiting the Grand Canyon. I had never seen it in person, and I never imagined that, through Vyvo's Lifestyle Holiday trip, I would have the chance to experience this. At first, I just thought I'd go there and casually take some photos, maybe post them on IG or Facebook to share with friends. But once I got there, I realized — wow!

“At that moment, I felt like this was something deeply personal, a moment for my own heart. I truly felt that I had made it there through my own efforts. I came to understand that, for us young people, it's only by stepping out, seeing different parts of the world, and leaving our comfort zones, that we can truly envision a broader and farther-reaching future. And it also gives us more motivation to face the future and take on even greater challenges.

“It was about two years ago when I first learned about Vyvo. I was actually working in the information technology field and I realized that Vyvo combines health data with blockchain technology to create an ecosystem for generating passive income. This kind of model is very friendly to young people.”

Tan Choi Ai

“Thanks to Vyvo for this Lifestyle Holiday trip, which gave me the opportunity to come to Las Vegas and personally experience and witness one of the world's most famous and magnificent natural wonders — the Grand Canyon. It also confirmed the saying: ‘Reading thousands of books is not as good as traveling thousands of miles.’

“After visiting the Sphere, I was amazed by the development and advancement of technology. It also inspired a new perspective in me: the importance of personal experience in life. Attending Lifestyle Holiday not only allowed me to receive first-hand information, but also helped me understand the company's future direction. As a leader, this enables me to plan and prepare in advance and easily follow the company.

“What impressed me even more was our CEO — Mr. Fabio's forward-thinking, tech-savvy mind. I'm truly grateful to the company for this Lifestyle Holiday, which not only broadened my horizons but also allowed me to learn so much. I'm deeply moved and feel fortunate about the decision I made to join Vyvo. I also want to inspire more people to join me in supporting our CEO's great vision to grow, to learn, and to change the world!”

Fumie Uchibori

“What surprised me most was the daily hospitality from Vyvo. Every day, they hosted wonderful parties for us, and we even got to go to the Grand Canyon, an experience I had never had before. We saw some truly amazing shows, too. Every day has felt like a dream. I'm so glad I joined this trip.

“What truly moved me was meeting Fabio, someone who might actually change the world. His way of thinking, and the things he shares in his presentations, always fills me with excitement. Being able to meet someone who inspires that kind of excitement is the best thing about being part of Vyvo.”

Tu, Yu Hsuan

"Participating in the Vyvo Lifestyle Holiday to Las Vegas was an unforgettable and inspiring experience. From the warm welcome at the opening dinner to the breathtaking Cirque du Soleil performance, every moment was filled with excitement and surprise. The one-day tour to the Grand Canyon left me in awe—the magnificent natural landscapes felt like stepping into a movie scene. The retro-themed dinner party was lively and creative, allowing me to fully relax and enjoy meaningful interactions with global partners. Each day brought a brand-new experience, keeping me energized and excited from morning till night.

"I'm truly grateful to have joined Vyvo. This has been a life-changing journey. From first discovering the platform to embarking on Lifestyle Holiday to Las Vegas, I've deeply felt the warmth of the team, the professionalism of the system, and the powerful drive for continuous growth. This journey opened my eyes to the possibilities ahead and strengthened my goals and direction. It's an incredible honor to walk alongside so many outstanding partners in the Vyvo family, learning and growing together every step of the way."

Megumi Ito

"Vyvo's hospitality was truly exceptional. I was deeply moved by Cirque du Soleil, and during the Grand Canyon tour, I could feel the earth itself and fully enjoy the wonders of nature. At the gorgeous gala party, I had the chance to interact with Vyvo's executives and many other members, and I had such a wonderful time. It was five days of extraordinary experiences!

"I feel truly fortunate to be part of a real DAO and a world-class project. With the launch of Vyvo AI, Vyvo's ecosystem is becoming even more complete, and I'm thrilled to imagine how this will accelerate the business!"

Every Lifestyle Holiday qualifier earned their place through focus, consistency, and a genuine passion for sharing the Vyvo story. With the bar set higher than ever, we're already looking forward to Lifestyle Holiday 2026.

Insightful Perspectives from Ambassador Influencers

OUR AMBASSADOR INFLUENCERS STAND AT THE PINNACLE OF THE VYVO SOCIALFI REWARDS PROGRAM BY VIRTUE OF THEIR LEADERSHIP, TEAM-BUILDING PROWESS, AND COMMITMENT TO SHARING VYVO.

We asked our Ambassadors to look back on experiences from 2025 and share their perspective and advice. Their words can benefit all Vyvo Influencers as they advance our movement. How can you apply their experiences to your efforts?

**Johnny Chia
Samanther Ng**

Ambassador Influencer 5 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

One of the most unforgettable moments was standing in Miami, surrounded by the roar of supercar engines, watching achievers receive their keys as symbols of vision, grit, and reward. This represented dreams realized through innovation and persistence. Shortly after, visiting the Dallas GPU farm and witnessing the cutting-edge development of AI left us in awe. Seeing the fusion of health, blockchain, and AI unfold reminded us that Vyvo is building opportunities and shaping the future.

**Kazuya Maruyama
Michihiro Kataoka**

Ambassador Influencer 5 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

Meeting Vyvo has allowed us to believe in ourselves and in the possibilities of the future.

Each time we witness the evolution of Vyvo AI and the innovation of the personal ecosystem, we feel a real sense that the future is becoming a reality.

We believe that we are growing alongside cutting-edge technology, and we are truly happy to be moving forward—not alone, but together with all the members.

Lin, Yu Ti

Ambassador Influencer 4 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

This year with Vyvo has been truly rewarding. Winning the prestigious supercar award was an unforgettable honor, reflecting the company's thoughtful planning to inspire our community. During qualification, our team gave it everything—working tirelessly and creating vivid memories, even imagining our license plates. Though some missed the prize, I hope for another supercar event to reignite passion. The innovative Life CoPilot has been incredible, helping us connect with new friends, inspire them to join, and close exciting deals. Choosing Vyvo has been the most valuable decision of my life!

Wang, Hung Ming Chen, Chia Ling

Ambassador Influencer 4 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

People of all ages find Web3 projects novel and exciting when they first encounter them. Many seniors initially worry about new technology but many are willing to learn because they care about health. In the community, there is a 70-year-old who found our technology interesting. After wearing the device, abnormal data appeared immediately. Two days later, he quickly sought medical attention, and it turned out there really was an issue—preventing a possible tragedy.

Shan, Chao Hung Ku, Yung Hsin

Ambassador Influencer 4 Star

Q: What advice would you give someone just starting with Vyvo today?

This is not just a career, but a global trend combining AI technology, health, and financial freedom. You are opening a door to a greater future and you don't need to be perfect at the beginning. Think about who around you is eager for change and a better life. You are never alone on this journey, so stay close to the team and system. Don't try to do it on your own, as true strength comes from growing and thriving together.

Hirotaro Takahashi

Ambassador Influencer 4 Star

Q: What was your favorite Vyvo event, workshop, or experience, and why?

Above all, it is the opportunity to hear cutting-edge technological information directly from CEO Fabio and the Vyvo management team. Recently, a professional from the technology sector who attended one of our study sessions was truly astonished by Vyvo's level of advancement. They remarked that Vyvo operates in a domain far beyond what is attainable in Japan. I am grateful not only for the privilege of accessing such state-of-the-art information, but also for being empowered to generate income through it.

Susumu Igarashi

Ambassador Influencer 4 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

In my community, there was a man who had lost confidence in his physical strength after undergoing heart surgery. By using Vyvo to record his daily health and receiving encouragement from his family and friends, he kept taking one step at a time. Six months later, he completed his first marathon with his grandson. With tears in his eyes, he said, "I never thought the day would come when I could run again," a moment that gave great courage to everyone around him.

Makiko Soejima Akihiro Inoue

Ambassador Influencer 2 Star

Q: What advice would you give someone just starting with Vyvo today?

You may not have a special job, know influential people, or have had a prestigious education, and yet, Vyvo has prepared a world for you that you would never discover by living an ordinary life.

You are about to experience that world with wonder and excitement. Right now, you've opened the door and taken your first step inside. May the radiant light ahead fill you with hope, and may you move forward with excitement.

Yukiko Tamura

Ambassador Influencer 2 Star

Q: What was your favorite Vyvo event, workshop, or experience, and why?

What I feel every time is that nothing makes me happier than spending time with Fabio and the rest of the executive team. I'm truly grateful for the ultimate hospitality shown at the final day's gala party, which was clearly the result of much thought and effort. The gala parties in Italy, Singapore, and Miami especially, have become the most wonderful and unforgettable memories. Also, during the Holiday the jungle tour by jeep in Koh Samu was a thrilling adventure and such an enjoyable experience.

Yoshie Komami

Ambassador Influencer 2 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

At the beginning of this year in Miami, I was warmly welcomed by Fabio's family and had a dreamlike experience, including driving around the city in Ferraris and other luxury sports cars. I am truly grateful for the hospitality of Fabio and everyone involved, and in Dallas, I was also given the valuable opportunity to tour the GPU server farm.

Tu, Ya Li

Ambassador Influencer 2 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

I was an entrepreneur in a traditional industry and, a few years ago, had the opportunity to join this AI technology business. I didn't understand it, but I believed this trend would inevitably enter our lives so I worked hard to learn and understand. My mindset opened up, and I developed a deep passion for this business. Today, I lead a vast community from around the world. We focus on learning how to develop and promote this great Vyvo business more effectively. Together, we live with love and spread happiness.

Chiho Yamashita
Ambassador Influencer 1 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

I'm proud to be part of a groundbreaking challenge for humanity. As I pursue my dreams on a global stage, I've come to a place where I can show my children what it means to live with true passion and purpose.

Chiu, Hwa Lih Chang, Hsuan Wei
Ambassador Influencer 1 Star

Q: What was your favorite Vyvo event, workshop, or experience, and why?

Lifestyle Holiday in Las Vegas with my teammates! It wasn't just sightseeing — it was an inspiring and unifying learning journey. Leaders from different regions came together to share experiences and learn the success mindset. The sense of unity and mutual support within the team deeply moved me. We gained a clearer vision and renewed passion for our business. What Vyvo offers is true growth and meaningful connection. This kind of journey is irreplaceable!

Chen, Chiung Min Chiang, Chi Shan
Ambassador Influencer 1 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

I have met many hardworking people, and among them, Elite Influencer Hsiang Yun deeply inspires me. Even as she grows older, she still chooses to move forward with determination. She refuses to hold out her hand or be someone who relies on others' pity. Through her actions, she has proven that true security comes from relying on oneself. She often says: "As long as I can still learn and still do, I shouldn't stop." These words not only touched me but also deeply moved me.

Lin, Ya Li Lin, Meng Shan
Ambassador Influencer 1 Star

Q: What advice would you give someone just starting with Vyvo today?

Congratulations on opening a whole new door of possibilities for your life. This is not just a job but an entrepreneurial journey of your own. AI technology and health wearables are the trends of our time, and we have the opportunity to change the future. But success never happens overnight. Give yourself time and be willing to take action. Remember, this is a path you take for your dreams, and it's worth giving your all. You are not alone — we move forward together!

Yu, Chin Ling Wang, Yao Chung

Ambassador Influencer 1 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

Every year, Vyvo travel lets me explore the world. Though the journey is far, the scenery is right before my eyes. Each event and itinerary is a brand-new experience and feeling. Las Vegas shines brightly as a beautiful city that never sleeps. I am grateful for Vyvo's travel arrangements — every itinerary is moving. You must personally experience this top-tier travel. Life moves life, memories last forever, and career peaks are reborn. Don't miss any of these premium trips!

Kuo, Fang Wen Pan, Pin Ju

Ambassador Influencer 1 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

A simple and genuine life journey began with a moment of curiosity, bravely venturing into the tech industry. Vyvo Group turned out to be a gold mine in the tech empire. I believe everything that has happened is the best arrangement from above. I was fortunate to board this high-speed wealth train, filling my life with thrills and excitement. I have faced countless challenges and broken through many barriers. Maintaining an optimistic and learning attitude, I embrace a joyful and abundant future.

Hu, Chuan Chuan

Ambassador Influencer 1 Star

Q: What was your favorite Vyvo event, workshop, or experience, and why?

Every trip organized by Vyvo is truly a privileged and amazing experience! Over the past three years, I have traveled with Vyvo to Okinawa, Tokyo, Singapore, Koh Samui, Italy, Miami, Dallas, and Las Vegas. From Asia to the Americas, these journeys have given me many first-time experiences in life (speeding in a supercar in Miami, experiencing the world entertainment capital, the romantic and charming beaches of Koh Samui...). My horizons have broadened, allowing us to keep up with trends and travel the world together with Vyvo!

Cho, Chun I

Ambassador Influencer 1 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

For many seniors, using smartphones and new technology is not easy. But through Vyvo's integration of smart devices, blockchain, and AI technology, members learn step by step, gradually mastering these tools and even surpassing many younger people. They not only learn new technology but also regain confidence and a sense of achievement, opening a new chapter in life. Understanding comes from continuous learning, and mastery comes from dedicated effort.

Lin, Yu Chien

Ambassador Influencer 1 Star

Q: What advice would you give someone just starting with Vyvo today?

Keep an open mind and keep learning. Vyvo is a platform full of innovation and opportunity. From advanced wearable devices to revolutionary blockchain technology, continuous learning can bring lasting impact. Vyvo AI is a proactive intelligent AI platform, an AI that grows with you. It is your personal Life CoPilot, evolving with you and shaping the future together. It can help you detect health signals that were once unmeasurable and, subtly, assist you in transforming into a better version of yourself. Remember—keep learning!

Hsu, Wei Yun

Ambassador Influencer 1 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

What moves me most is the culture of wholehearted giving and mutual support. The most unforgettable moment was receiving the “2024 Mentor of the Year Award” on stage, moved to tears. From a full-time mother away from work for 12 years, I’ve grown through leaders’ guidance and my connections’ support, gaining strength from challenges. I now pass on these skills and beliefs, like a spark spreading love to light up more lives. This is not just career growth—it’s a soul-stirring transformation I deeply cherish.

**Chiu, Tsui Yuan
Hung, Wei Che**

Ambassador Influencer 1 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

When I was a child, I focused on studying; as an adult, I learned AI and even learned how to love myself through data. After joining the Vyvo community, I began to understand the value of “technology combined with action.” The daily data reminds me: it’s not just about being alive but about living with quality. The positive and efficient environment in the community has helped me find confidence through sharing and growth through challenges.

**Chiang, Po Lin
Wu, Lien I**

Ambassador Influencer 1 Star

Q: What was your favorite Vyvo event, workshop, or experience, and why?

I especially love Lifestyle Holiday. We believe that Lifestyle Holiday has brought us great rewards—relaxing our body and mind and strengthening our relationships with each other. Being able to earn such an opportunity through hard work gives us a great sense of achievement and motivates us to keep striving in the future. The company’s willingness to provide this kind of reward makes us feel truly valued and enhances our sense of belonging to the team.

Wu, Ping Chen Cheng, Ching Yi

Ambassador Influencer 1 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

I have a connection who initially paid little attention to health and technology, but since encountering Vyvo has begun to realize that health management is a global trend. He not only uses the data provided by Vyvo to review his lifestyle habits but has also discovered the role of AI in personal growth. Through intelligent analysis and continuous tracking, he gradually optimizes his routine and improves his condition, thereby influencing more people to join this wave of change.

Shih, Yang Feng Shih, Jyun Yuan

Ambassador Influencer 1 Star

Q: How has being part of the Vyvo community impacted your personal growth or mindset?

Major victories are never achieved overnight. Simply put, we all need wait for the process to unfold and for our abilities to take shape. In history, Toyotomi Hideyoshi started as a sandal vendor and step by step rose to become a powerful ruler. Taiwan's presidents also went through years of perseverance before reaching positions of leadership. In our business, harnessing the company's resources and maximizing returns isn't about short bursts of effort but about consistent time and action, building trust and capability.

Chien, Miao Chen Lin, Fang Ju

Ambassador Influencer 1 Star

Q: What is one memorable moment or story from your Vyvo journey that stands out this year?

I took a long flight to Las Vegas and the moment I landed, the company arranged VIP treatment! The hotel was incredibly beautiful; I couldn't help but scream with excitement. The city was stunningly glamorous and even though I don't gamble, I could still feel its charm. Plus, a breathtaking, once-in-a-lifetime visit to the Grand Canyon! But Fabio's meeting touched me the most. He shared technology in a way we could all understand, and those two hours were anything but boring.

Lin, Yi Wen

Ambassador Influencer 1 Star

Q: Have you seen someone in your community achieve something remarkable with Vyvo? Tell us about it.

My connection believes that Vyvo has a complete and mature ecosystem where health data can be monitored anytime and properly secured, while also earning pocket money or retirement income. Recognizing this positive cycle, he actively promoted it. After a period of intense promotion, hundreds of friends and family members began wearing smart wearables to care for their health. It truly is a win-win situation.

Peering Into the Future of AI

with Fabio Galdi

If anything has become clear in the world of artificial intelligence, it's that today's breakthroughs will be quickly eclipsed by what we see tomorrow, next week, and beyond. As this technology evolves at an exponential pace, predicting what AI will be like in 10 years is nearly impossible — just as, 10 years ago, no one could have predicted how rapidly AI would have advanced by 2025. Imagine showing DeepSeek to someone from 2015!

As the visionary founder of Vyvo, Fabio Galdi is closer than most to the cutting edge of technology and is often two moves ahead of everyone else. What does he believe AI will look like in three, five, and 10 years? What are the positive benefits, and the possible perils, it will deliver? We asked him to share his ideas.

Fabio, the first announcement of Vyvo AI came at Lifestyle Holiday 2024. Are you satisfied with the progress the platform has made to this point?

Yes ... and no! What I mean is, the functionality of Vyvo AI is on schedule. At this stage it's performing even better than we had projected. My "no" means it took longer to get the foundational infrastructure in place than anticipated, but getting that right was critical. And the beta phase was very productive in terms of pushing and improving the platform — exactly what you want from beta testing.

We're very pleased with the current state of Vyvo AI, and, when you think of it, right now it's the "worst" it will ever be. We'll continue to expand functionality, but the AI itself will also evolve as it learns more and more about its users. That's the essence of what makes AI so powerful and useful.

On the topic of progress, what do you believe the world of AI will look like at the start of 2029?

A lot of people are probably waiting for something like the movie *Her*, but I think that will take more time. In other ways, though, AI in 2029 will be starting to solve big, important problems, like treating what were thought to be incurable diseases, making agriculture more efficient and sustainable, identifying new manufacturing processes or tech that unlocks energy, and even improving how we drive and fly.

AI is much more capable of finding patterns and connecting data than humans are. It can work constantly — AI doesn't need a lunch break or sleep — so it's inevitable that it will start to deliver novel insights that end up changing the world.

On an individual level, even before we have something like "Samantha" in the movie *Her*, AI will be in our homes, our cars, our entertainment platforms, and will be a huge part of how we work. Some think the smartphone will fade away, but I'm not so sure. If it happens, it won't be in three years. Smartphones didn't make desktop and laptop computers obsolete, and, so far, attempts to replace smartphones with AI devices haven't gained traction.

There's a growing global conversation about AI ethics, data misuse, and centralized control. How is Vyvo preparing to address these concerns as AI becomes more pervasive?

These are the exact concerns our platform is designed to address and manage — it all goes back to the Vyvo Smart Chain. By using our proprietary blockchain, every user's data is private and secure. There is no centralized control, and no one, in or out of Vyvo, can access the data.

For Vyvo AI to be as useful as possible, you'll have to give it access to many parts of your life and share personal details with it. Because of how we have built the system, because of the absolute security of blockchain, people can trust Vyvo AI and confidently share data with it.

As unique and powerful as Vyvo AI is, this protection of privacy is really our differentiated advantage. People are free to use AI from the Big Tech companies, but that comes with the price of privacy concerns. Our approach is different from the ground up.

In addition to using blockchain, Vyvo has taken a unique approach by tying wearables to AI. Why was it important for you to integrate these technologies, and how do you believe they will empower individuals over the coming 5 years?

The wearables/AI connection goes back years. By 2017, we were already developing AI algorithms for health predictions, and Vyvo AI is simply a very robust evolution of that.

AI needs inflows of data to be effective. For example, if you don't give Vyvo AI access to your calendar, it can't schedule appointments and reminders for you. Wearables are another valuable data source, specifically regarding user wellness.

Data collected by wearables helps Vyvo AI deliver personalized feedback and advice, which makes it easier for the user to make better, timelier decisions, which enhances daily life. So, the wearables collect the data, blockchain, as mentioned, protects and verifies the data, and Vyvo AI analyzes and reports the data in ways that make it valuable and useful for the user.

I think the empowerment over the coming years is from getting familiar with and trusting AI — or at least trusting Vyvo AI! Using it, giving it tasks, seeing the benefits, and connecting with it on an emotional level. Our ecosystem approach, where it's all tied together for maximum privacy and utility, is the ideal way to get started with AI.

What will AI feel like to users 10 years from now? How will human-machine relationships have evolved by that point?

Right now, interacting with an AI and getting what you want takes some effort and coaxing. We humans have to be very precise in our instruction, and even then it can require repetition and fine tuning. And, most people interact with AI by typing on a computer or phone.

As I've said before, I see a future where everyone has an AI Life CoPilot, just as everyone now has their own smartphone. Obviously we hope it's Vyvo AI. At the current pace of development, I believe this will happen in the next 10 years, and probably sooner.

Experience Your
Life CoPilot.
Scan to get started.

By that point, human-machine interactions will be natural and normal, defined by vocal and video interactions. Ten years from now, no one will need to type a message to an AI. It will have full contextual awareness, so getting a task done won't require a complicated recap or update for the AI. In the next 10 years, I think we'll have something like "Samantha".

As someone focused on decentralization and community empowerment, how do you see AI transforming economic systems—particularly for the billions still left out of the digital economy?

This is the great unknown. Earlier this year, *The Economist* reported that an AI think-tank projects that, once AI can carry out 30% of tasks, annual growth will exceed 20%. To put that in perspective, before 1700 the world economy grew, on average, 8% a century. Once the Industrial Revolution took off, growth exploded to 350% a century.

Can AI really fuel 1000% economic growth in a century? Even a researcher at that think-tank believes the model to be "definitely wrong." Most predictions assume that AI will take over all the jobs that it can, which sounds like massive unemployment.

But, think back to the '80s and '90s when the computer became an essential business tool. Perhaps initially it meant some people lost their jobs because they could be digitized. But, over time, many more new roles were created, especially as the internet became central. Twenty years ago, no one was a social media manager. No one had a career making videos for YouTube. In the long run, disruptive technology tends to create more than it destroys.

I believe the spread of AI will lead to all kinds of new opportunities that no one has thought of before. And, for those who join our movement, **this is your AI**. The data is yours, you can own part of the infrastructure, and you benefit from expanding the market. These are our three critical pillars.

Finally, what do you say to those who are suspicious of AI, or don't have any desire to use it?

It's easy to find reasons to be suspicious, but those reasons are based more on books and movies than reality. We need to remember: AI is a tool, and most people aren't suspicious of a hammer or a wrench. That perspective changes everything and makes it easier to accept AI.

Those who don't want to use AI are in danger of being left behind. Again, it's a tool, a powerful tool that makes everyday tasks easier. Not only that, it's at the cutting edge of technology. Can you imagine someone not wanting to use a smartphone or a computer these days? Or could you picture someone still using a typewriter? Not using AI will only make you less efficient, less aware, less productive. The frontiers of technology continue to advance, and it's not practical to stick to the old ways of doing things and still hope for positive outcomes.

My advice is simply "don't be afraid." Embrace this technology and make it part of your life. Realistically, in a few years it will be impossible to avoid, so you might as well get comfortable with it now, and Vyvo AI is a great place to start because of the emotional understanding it offers and how it learns from and with you.

Premier Workshop

Deepening Influencer Knowledge, Vision, and Passion

The 2025 Spring Premier Workshops continued the successful, hands-on events we introduced in 2024 to great acclaim. This year's gatherings have been even **bigger** and **better**, with a focus on Vyvo AI.

Each was an incredible time of learning, collaboration, and connection. Market Vice Presidents led the festivities, while corporate leaders shared their copious knowledge to help attendees sharpen their skills and strengthen bonds within our passionate community of **Premier Influencers**.

An attendee of the Chinese market workshop shared, "I think it was perfect and I benefited a lot. Thanks to the organizers of the conference and all the participating partners and staff!"

From Tokyo, another Influencer reported, "We are grateful to you for planning and running such a wonderful workshop, and we look forward to holding even more meaningful events for the participants in the future."

We're already looking forward to the 2026 Premier Workshops!

Inside Vyvo's AI Revolution

A Conversation with Hakan Kozakli

Hakan Kozakli
CTO of Vyvo Group

In the evolving frontier of decentralized technology, Vyvo has positioned itself as a trailblazer by launching one of the most forward-thinking AI innovations in **Web3: Vyvo AI**, your Life CoPilot. At the helm of this initiative is Hakan Kozakli, Vyvo's Chief Technology Officer, whose work is shaping how we interact with AI—not as mere tools, but as emotionally intelligent companions embedded into daily life.

In this exclusive interview with *vLife Magazine*, Hakan walks us through the architecture of Vyvo AI, how it redefines user interaction with AI, and what the future holds for developers and users alike in this privacy-first ecosystem.

“From Idea to Intelligence”

Hakan, for those just discovering Vyvo, can you tell us about your role as CTO and your journey in bringing Vyvo AI to life?

I've been involved in building decentralized systems for more than a decade, but with Vyvo, we set out to do something different—to create an AI operating system that's **personal, ethical, sovereign, and utilizes blockchain**. One of my main goals as CTO is to design the architecture and intelligence layer of Vyvo AI, ensuring that it adapts not just to user needs, but to their values, rhythms, and preferences. We didn't want to build another assistant. We wanted to build a **life companion that learns, evolves, and protects**, from the ground up.

“Beyond Assistant—A Life CoPilot”

Vyvo AI is positioned as a Life CoPilot, not just an assistant. How does this change the paradigm of human-AI interaction in our daily lives?

The key difference is agency. A digital assistant waits for instructions, but a Life CoPilot **anticipates, advises, and evolves** with you. Beyond responding, Vyvo AI will also initiate. Whether it's suggesting wellness routines, summarizing your calendar with emotional context, or offering a gentle prompt during moments of stress, it acts like a **living, learning entity**, designed to support and enhance your personal and professional life, all without invading your privacy.

“Trained by You, for You”

Personalization is central to Vyvo AI. How is user data processed and trained to deliver a truly unique AI companion while maintaining absolute data privacy?

Vyvo AI uses a **hybrid AI model** that stores and trains on user data encrypted with the help of blockchain technology on user-owned encrypted nodes on the Vyvo Smart Chain. That means no one—not even us inside the company—can access your personal data without your explicit consent. Every interaction you have with the platform fine-tunes its behavior. Over time, it becomes a digital mirror of your best self—trained by you, for you. **Zero privacy-concerns. Zero compromise.**

“An Emotionally Intelligent System”

The system offers proactive and emotionally intelligent responses. Can you elaborate on how emotional context is detected and acted upon in real time?

This is where the **emotional OS layer** of Vyvo AI kicks in. We leverage behavioral pattern recognition, voice tone analysis, biometric inputs (from wearables), and even textual sentiment cues to **detect emotional states**. Based on those signals, Vyvo AI might shift tone, delay a task, offer encouragement, or suggest a mindfulness break. It's not just smart—it's **emotionally aware**, designed to make users feel seen, not just served.

“Multimodal Brilliance”

Multimodal interaction—text, audio, video—is a key feature. What breakthroughs made this possible and what does it unlock for users?

We built Vyvo AI from day one to support **multidirectional input and output**. That means you can engage with your Life CoPilot via text, voice, or even video. Behind this is a modular interaction engine that's both lightweight and extensible. It **unlocks true fluidity**—you can start a task via text, continue via voice, and review insights via video. It adapts to your context, not the other way around.

“Open for Builders”

With app extensibility and future GPU staking, how will developers and infrastructure participants shape the future of Vyvo AI and its open ecosystem?

Our AI is a self-contained platform, an operating system or OS. Developers will be able to create modular apps, extensions, and personalized agents within the OS. With GPU staking, we're creating incentives for infrastructure participants to contribute compute power and earn. It's a virtuous cycle: the more people contribute, the smarter and more powerful the collective AI becomes—without ever sacrificing decentralization. We're laying the groundwork for a **truly democratized AI economy**.

Final Thoughts

The unique Vyvo AI offering is a reflection of a deeper shift in how we define intelligence, ownership, and companionship in a digital age. With Hakan Kozakli's vision and engineering leadership, Vyvo is building an AI future that's not only innovative but **human-first, emotionally aware, privacy-oriented, and ethically grounded**.

Hear more from
Hakan

Your Own AI Business

A Visionary Conversation with Alessandro Senatore, CEO of Vyvo SocialFi

By Antonio Pagano – Director, vLife Digital

The Rise of the AI-Powered Entrepreneur

*“The future of work isn’t remote or hybrid.
It’s decentralized, AI-empowered, and user-owned.”*

– Alessandro Senatore, CEO, Vyvo SocialFi

We’re at a turning point. The tools that once belonged only to tech giants—AI, blockchain, data ecosystems—are now being reshaped and reimaged for individuals.

Vyvo is leading that charge. With its innovative Vyvo AI and Vyvo SocialFi platform, it’s empowering people to transform their everyday actions into meaningful, sustainable income, without needing to be experts, marketers, or developers.

Alessandro Senatore, CEO of Vyvo SocialFi, has contributed to this shift. With clarity, empathy, and a visionary mindset, Alessandro is helping define what it means to build not just a business, but your own AI-powered lifestyle, one built on trust, data sovereignty, and authentic connection.

Alessandro, what does “Your Own AI” really mean—for someone looking to grow a business, and for someone just wanting a smarter, more personal AI in their daily life?

It’s a big shift from how digital platforms have worked until now. Most people are used to being the product—our data gets tracked, packaged, and monetized by companies, and we rarely see any of that value.

Vyvo flips that. On the **business side**, “Your Own AI Business” means you’re not just using a platform—you are the platform. With Vyvo SocialFi, your influence, your connections, and your activity become assets that generate real earnings. You’re building a digital business where the value flows back to you, not a corporation.

On the **personal side**, it’s just as powerful. Vyvo AI becomes your Life CoPilot—always on, emotionally aware, and trained by you. It learns from your habits, adapts to your goals, and actively supports your life—not just with answers, but with guidance, suggestions, and foresight. You’re no longer a passive user of technology—you’re in control of an AI that’s built around you.

How do you ensure that people who aren’t tech-savvy still benefit from this kind of powerful ecosystem?

We knew from the start that accessibility had to be at the core. That’s why Vyvo AI is designed to feel like a natural presence in your life—a partner who listens, learns, and grows with you.

You don’t need to study AI or understand how blockchain works. Just live your life—and Vyvo AI does the rest. As it learns from your routines, preferences, and goals, your Life CoPilot evolves into more than a smart assistant. It becomes a truly personalized guide—helping you grow in meaningful, everyday ways: improving your wellness, deepening your communication, and strengthening your relationships.

Then, by simply connecting others to your Hub, spreading the word with the rest of people and doing so you’re extending that same experience to them—while unlocking new rewards and growing your own ecosystem. It’s product-first, experience-led, and built entirely around you.

SocialFi is central to Vyvo, and it stands for “Social Finance”—but is it really just about money?

It does represent Social Finance, but at Vyvo, it goes far beyond that. For us, it's all about a new model of digital empowerment—one rooted in ownership, connection, and everyday value creation. It's really all about AI-powered connection, where actions like sharing, engaging, and simply living become the foundation of a decentralized business.

You don't need to go viral or hustle nonstop to grow your business. With the SocialFi CoPilot, Vyvo's innovative AI-powered tool, growth happens organically and intelligently. The system is designed to work with you—structured, automated, and always optimizing—so your impact expands naturally, without chaos or complexity.

Let's talk about the Vyvo SocialFi App—how does it enhance that experience?

The app is a huge step forward. It brings everything together in one seamless interface—your earnings, your Hub activity, your AI business tool, your social impact. But more importantly, it's where Vyvo AI makes a real difference—by

transforming how you connect with people and grow your business. It's not just an upgrade; it's a fundamentally new way of building, scaling, and leading in this model. A truly revolutionary shift in how digital business works.

“We're not just building a platform — we're building something made by the people, and owned by the people.”

— Alessandro Senatore

We're not just helping you track results—we're helping you take action. From introducing the platform to new prospects, to answering questions, to following up with empathy—our SocialFi CoPilot handles it all. It's responsive. Intelligent. Human-like. And always aligned with your tone and preferences.

Over time, it learns your rhythm, helping you transform interest into connection,

and connection into lasting impact. More than “sales, this is **smart, personalized engagement**. And that's where real, sustainable value lives.

So the AI doesn't just support your business—it becomes part of it, it does the job for you?

Exactly. The SocialFi CoPilot is actively doing the work. It handles the repetitive, often overlooked tasks—like follow-ups, sharing the right links, and keeping conversations moving. These are the things that usually slow you down or get lost in the shuffle. But now, they're done for you—so you can focus on what really matters: building relationships and growing your business.

When someone follows your invitation and lands on your personalized link page. Within minutes, the AI jumps in—answering their questions, clarifying the opportunity, and guiding them based on their preferences. The best next step? A clear CTA: the AI invites them to register for free and head to the store to **activate their free trial** (if available), subscribe to the Life CoPilot, or **purchase a member bundle** if they're interested in the business.

What excites you most about Vyvo's next chapter?

Without a doubt, the people. Our community is full of **Future Makers**. These are individuals who are here to grow and not just earn. They're looking for alignment between how they live, what they value, and how they contribute to the world. They want more freedom—not just financial, but mental, emotional, and even spiritual.

What excites me is knowing that we're putting cutting-edge technology—something once reserved for institutions—**into the hands of everyone**. Vyvo AI is a tool to support people, improve lives, and amplify what already makes each person powerful.

We've made the individual the center of the platform—not the product. And together, this community is becoming part of something bigger: a shift in how technology serves humanity. A **real movement**, grounded in ownership, inclusion, and purpose.

It's still early in the process, but we're moving along. And more importantly, we're building on something **authentic**.

What would you say to someone still on the fence about being part of the Vyvo Revolution?

Our goal for the next year is clear: **One million empowered Members**. And in a system like this, **timing matters**. The earlier you step in, the more space you have to build, connect, and establish your presence within the ecosystem. It's not about rushing—it's about recognizing the value of being positioned early, while the landscape is still wide open.

But beyond the numbers, this is really a question of ownership. Are you ready to stop giving your time, data, and energy away to platforms that give nothing back? Or are you ready to start building something that's truly yours?

Besides starting a business, joining Vyvo is about **starting differently**. With support, with intelligence, and with a community that wants you to grow. If you've been waiting for the right moment, this is it.

The Final Word from Antonio Pagano

What struck me most in this conversation with Alessandro wasn't just the technology or even the SocialFi model itself. It was

"The most powerful business you can build starts with being yourself—and believing in you."

his unwavering focus on empowering people with tangible, intelligent tools that are built to support real lives. Tools that enable as much as they inspire.

Because the truth is, **you already carry influence**. You already hold value.

What's been missing—until now—are the systems that let you shape that into something lasting.

Whether you're just beginning to explore this space or already feel the pull to build, remember: in this new era, the most powerful thing you can own... is **you**.

When Things Get Smart

How IoT and Machine Learning Are Changing the Way We Live

By Antonio Pagano

We're living in a time when intelligence is no longer limited to the screen in front of us—it's embedded in the objects around us. From watches to rings, earbuds to pins, our devices are evolving into nodes of intelligence. The next leap forward in the AI-powered lifestyle will be all about living in continuous, seamless connection with our environment through IoT (Internet of Things) and machine learning (ML).

And we're just getting started.

At Vyvo, we've long believed that the next interface is no interface at all. Interaction should feel effortless, ambient, natural, and invisible. And IoT is the infrastructure that makes it possible.

Machine Learning: When Devices Learn You

Machine learning enables devices to go beyond programmed commands. They observe, adapt, and predict—constantly refining their responses based on how we interact with them.

Whether it's suggesting your morning hydration level, learning your workout habits, or detecting emotional changes based on biometric cues, ML personalizes the experience of everyday technology. But personalization is only the surface. The real revolution lies in contextual awareness—devices that not only understand you but also the moment you're in.

"Machine learning is what allows AI to evolve from a tool to a true companion," says Hakan Kozakli, Vyvo Group CTO. "It's not about automation; it's about resonance. A wearable that knows when not to interrupt you is more advanced than one that just follows your orders."

IoT: The Intelligence in the Everyday

IoT is what connects the dots. Think of it as the nervous system of your digital life. Your devices—wearables, sensors, appliances—can talk to each other, learn from one another, and synchronize with AI in real time. The possibilities are endless:

- A wearable that automatically updates your Life CoPilot with your stress level before a meeting.
- A discreet pin that recognizes voice commands in public spaces without the need to pull out your phone.
- Smart glasses that alert you to UV levels as you're walking through the city.

At Vyvo, we've long believed that the next interface is no interface at all. Interaction should feel effortless, ambient, natural, and invisible. And IoT is the infrastructure that makes it possible.

The Rise of Intelligent Micro-Assistants

Vyvo is always pushing the boundaries of personal technology and exploring ways to make it almost invisible, but at

the same time contextually intelligent and always connected. A Vyvo AI that is always ready, learning, and acting with emotional intelligence would be, for many, extremely helpful and eventually irreplaceable.

These ideas are part of Vyvo's broader mission: to decentralize intelligence, and bring **AI, blockchain, and smart sensing into everyday life**.

"We've moved beyond smart devices. What we're building now are smart companions," hints Fabio Galdi, Vyvo Co-Founder. "The next generation of wearables won't just track you—they'll understand and learn from you."

Privacy Must Scale with Intelligence

One of the most important considerations as we integrate ML and IoT into daily life is **data sovereignty**. The smarter the devices become, the more data they process. That's why all Vyvo innovations are built with **user ownership** and **on-chain encryption** at their core.

"No data should ever leave the device without your permission," emphasizes Alfonso Cioffi, Senior VP, IOT & Wearable Tech. "We're building systems that train on your

behavior but belong entirely to you. That's the foundation of ethical AI."

What Comes Next

At Vyvo, we're redesigning how humans experience intelligence—moving from screens to senses, from apps to ambient AI.

Machine learning and IoT are already here. They power your wearable. They tune your Vyvo AI Life CoPilot. And soon, they'll be woven into the very fabric of your digital presence—sometimes visible, often invisible, always working for you.

Because the future isn't just smart.

It's **you-smart**.

Antonio Pagano is Director of vLife Digital and Editor-in-Chief of vLife Magazine. He writes at the intersection of innovation, privacy, and human-centered AI.

The Future We Spoke Into Existence

In 2024, on stages across Taiwan, Japan, and Malaysia, Vyvo presented a bold vision for ethical AI and true data ownership—one that has rapidly transformed from an ambitious idea into a cornerstone of our global ecosystem.

This vision was never just about technology; it was about people. It challenged the centralized models that dominate today's digital landscape—models that harvest and monetize user data without consent—and replaced them with a decentralized framework designed to give control, privacy, and value back to the individual.

From Concept to Reality

The Vyvo AI Life CoPilot is at the heart of this transformation. Far more than a mere assistant, it's a living system—context-aware, adaptive, and always aligned with your best interests. It understands your habits, anticipates your needs, and acts proactively, all without compromising your autonomy or privacy.

The foundation of this trust is the **Vyvo Smart Chain**—our blockchain infrastructure that embeds consent directly into its architecture. This means users own their data. As Fabio Galdi, Vyvo's CEO, emphasizes, "We didn't add privacy as an afterthought. We built the system around it."

"For the first time, your AI truly knows you—but you're still the one in control. That's a paradigm shift in the AI age."

— Alessandro Senatore, CEO of Vyvo SocialFi

Vyvo AI is fully integrated with the Vyvo SocialFi ecosystem, creating real-world earning opportunities through what we call DataFi.

Data NFTs: The Key to Personal AI Ownership

Our Data NFTs redefine what it means to own your digital identity. Far beyond a static token, each NFT links to your evolving personal memory profile—an encrypted, user-governed dataset that your Life CoPilot uses to serve you better.

For Alessandro Senatore, CEO of Vyvo SocialFi, this is a milestone for the AI era. "For the first time, your AI truly knows you—but you're still the one in control. That's a paradigm shift in the AI age," he says.

This innovation also changes how the world views blockchain. Instead of speculation or hype, blockchain here becomes **ethical infrastructure**—an invisible yet essential part of daily life that manages health data, decisions, and digital identity with security and integrity.

Shaping Blockchain's Human Future

Hakan Kozakli, Vyvo's CTO, sees the bigger picture. "Blockchain, when paired with AI in the right way, has the potential to return agency to billions of people," he says. "Vyvo is proving it can be done without sacrificing usability or humanity."

Our approach reframes blockchain not as a finance-only tool, but as a trust and empowerment layer for deeply human applications—from health monitoring to life decision-making.

Part of a Living, Expanding Ecosystem

Vyvo AI is fully integrated with the **Vyvo SocialFi** ecosystem, creating real-world earning opportunities through what we call **DataFi**—turning the rhythms of daily life into sources of both wellness and income.

Whether it's a wearable tracking your steps, a meeting powered by our AI, or a secure data-sharing interaction you've authorized, each moment contributes to your personal digital asset base—assets you can choose to monetize or keep entirely private.

Looking Ahead

With the upcoming general launch of Vyvo AI, your Life CoPilot will move from simply remembering your preferences to evolving with you in real time. The system will adapt not only to your actions but also to your growth, creating a truly lifelong AI relationship.

We're also expanding into areas like emergency response, travel assistance, and AI-powered smart home robotics—all built on the same privacy-first, user-owned foundation.

An Open Invitation to Build the Future

This is not a closed system—it's an open, collaborative environment. Developers can create new actions and agents, entrepreneurs can integrate solutions, and everyday users can influence the roadmap through feedback and participation.

We envisioned a world where people feel assisted, not observed; empowered, not exploited. That future is here, and together, we're making it stronger every day.

*Your Life
CoPilot will
move from
simply
remembering
your prefer-
ences to
evolving with
you in real
time.*

Where the Best Rise Together

For the few who shape the many.

From roaring supercars to oceanfront luxury, our last Prestige Club experience in Miami was unforgettable, an electric blend of celebration, connection, and pure Vyvo energy.

This prestigious recognition is all about what you've earned and who you've become along the way. Each year, the Prestige Club celebrates the pinnacle of performance and purpose. And for 2026, **we're going back to Miami**, and taking all of our extraordinary Prestige Club members!

Early 2026

“Prestige is a
lifestyle.”

The Prestige Club is a milestone, a moment that says you’ve made it, yet your journey is only beginning. Be among the Ambassador Influencers who experience it.

The Vyvo Prestige Club.
Earn it. Live it. Be legendary.

Personal Empowerment Through Vyvo

How technology, community, and ownership inspire a new generation of achievers.

The mission of Vyvo SocialFi is to empower people everywhere to benefit from the convergence of blockchain, wearables, and artificial intelligence, while also protecting the privacy of their data.

Just as each Member comes to Vyvo with different goals, the empowerment each Member experiences is unique to them. Another way to look at it: As we illustrated in issue #2 of *vLife Magazine*, there are four main Vyvo pillars that draw people

to us, as suggested by the above mission statement. These “entry points” are:

- **Blockchain**, with its data privacy and decentralized benefits.
- **Wearables**, which precisely monitor and track **personal wellness data**.
- **Vyvo AI**, an AI that is yours because the data is yours, you own part of the infrastructure, and you benefit from expanding the market.

- Earning **personal rewards** through SocialFi and data mining.

Each of these attractive and distinct pillars delivers great value to Members — and yes, empowerment — as part of the Vyvo community. Below, we share experiences from a few Vyvo Members about the empowerment they have found since joining us.

Akiko Tsunezumi

Vyvo opened the door to a whole new era for me. With AI seamlessly woven into my everyday life, I can accomplish more, with less effort, and with greater joy.

I've honed my skills through creating YouTube content, discovered the enjoyment of building wealth with Vyvo SocialFi, and connected with inspiring peers. Together, we lift each other higher, turning every challenge into an opportunity, and making each day a step toward a richer, more empowered life.

Sachiko Ogawa

After discovering Vyvo SocialFi, I realized that my actions and lifestyle can create value. The accumulation of my daily activities has become an asset, and I now truly feel a sense of financial independence. Above all, I am deeply grateful for the companions who have learned and taken on challenges with me. Their presence is my greatest source of strength today.

Shogo Terada

I have been expressing my true self and sharing my daily self-management habits through devices such as watches and bands that suit each person. I value 1% of the 1,440 minutes in a day—that is, 15 minutes—and by “sharing Vyvo with someone every day,” I naturally nurture connections with people, calmly reflect on why I am working with Vyvo, and take positive actions each day with excitement. Every day feels incredibly enjoyable, and I simply can't get enough of it.

Wellness

Vyvo Smart App

Wu, Shih Fang

I used to live by instinct, often anxious from stress. Using Vyvo's BioSense™ Watch and Vyvo Smart App, I truly learned to listen to my body. Health reminders help me pause and breathe, while sedentary alerts help correct my bad habits. Tracking data made me aware of diet and exercise, motivating me to go outside, move more, and enjoy sunlight. My life gradually became more vibrant.

What touches me most is I'm not alone. Through team learning and Ambassador Granda's guidance, we support each other in understanding AI and health trends. This connection gives me belonging and purpose. Now, I eagerly anticipate Vyvo AI Life CoPilot helping us thrive in wellness and the shared economy. Vyvo guides me toward a better life.

Fu, Hsiu Hui

Forced to leave work due to illness, I faced health worries and loss of income, filled with anxiety. Fortunately, I discovered Vyvo. With AI-powered wearables, I better understood my health, adjusted my lifestyle, and opened a new income source.

In the team, I found support, growth, and friends, realizing the power of passive income. Where I used to dislike exercise, data reminders pushed me to change. Now, I care for my health, build wealth, and support loved ones. My transformation began with Vyvo. From this moment, let's move forward together and create our own life's peak!

Passive income

AI-powered wearables

Confidence

Vyvo AI Life CoPilot

Lin, Ching Ju

On the journey of leading women entrepreneurs in our "Lady Troop," Vyvo AI Life CoPilot has become our most reliable support. More than a tool, it is a companion that understands and listens. Integrated with Vyvo wearables, it provides real-time data, personalized health guidance, and reminders to keep us balanced and moving forward.

With military-grade encryption and blockchain, our health data stays secure and fully under our control, giving us confidence to share and care without worry. When we feel lost, Vyvo AI reminds us, "You are worthy, you can do it," guiding us from working alone to growing and surpassing step by step.

Henry Ng

Vyvo SocialFi not only improved my personal wellness but also connected me with a supportive community. By sharing my health journey, I found encouragement and inspiration from others who are also building better habits. The platform showed me that empowerment grows when we uplift each other, whether through healthier choices, motivation, or celebrating progress together. It's more than just tracking data; it's about creating a positive ripple effect. Together, we are turning health into value and building a stronger future.

Jen Cheah

I never imagined social media could be more than sharing smiles and moments—until Vyvo gave me a mission. Today, it's not just about posting; it's about inspiring others to build wealth and confidence in themselves. I began with zero knowledge of AI or technology, yet Vyvo amazed me. This journey has taught me to care for my health while giving me more time freedom, reminding me to always prioritize my well-being before anything else. What I love most is the Vyvo community, where we share one vision and move forward together. Now, leading my own team, I carry not just my dream but theirs too.

As these inspiring stories of empowerment illustrate, Vyvo offers so many ways for people to engage in positive change, expand their knowledge and awareness, and achieve more. What an exciting message to share with the world!

From Magazine to Movement

vLife Is Just Getting Started.

By Rina Chong, VP of Global Marketing

What began as a beautifully printed publication was never just about pages or layout. It was about people. From the very first edition, vLife Magazine set out to be more than ink on paper, it was a platform to spotlight our top Influencers and our broader community, to recognize outstanding achievements, showcase global events, and reflect the energy of a fast-moving, ever-evolving movement. It was, and still is, about recognition, connection, and inspiration.

And yes, there's still something magical about holding a printed edition in your hands. The smell of fresh ink, the weight of stories that matter, the timelessness of a well-crafted page. That tradition continues with our Spring and Fall print editions — a nod to the tangible, the collectible, and the classic.

But the world doesn't move at printing speed anymore.

With AI accelerating, new products launching, DataFi evolving, and fresh opportunities emerging all the time, we need a platform as dynamic as the community it serves. And so, vLife has evolved from a magazine into a movement.

"vLife isn't just reporting on the movement, it's part of it. And now, so are you."

Today, vLife lives as a digital hub, a living, breathing space that mirrors Vyvo's transformation. We're shifting from passive information to real-time access, from curated updates to daily engagement, from a publication you wait for to one that moves with you.

And helping drive this shift is Antonio Pagano, aka AP, who is the familiar face and voice behind TechItEasy, now also leading the charge as Director of vLife Digital. His passion for making complex ideas simple and engaging remains unchanged; it's what continues to bridge people to the powerful innovations shaping our future.

This transformation reflects more than just a format shift. It mirrors **Vyvo's larger evolution** from centralized tech to community-powered ecosystems, from passive consumption to active participation, from trend-following to category-defining innovation.

So, what does the new vLife Digital offer?

You'll still receive the **iconic printed editions** twice a year, and now you'll also get **fresh, evolving content** including behind-the-scenes interviews, executive insights, tech explainers, recognition stories, community spotlights, global press coverage, and soon, video features.

Want to catch up on **Vyvo AI**, wearable tech, or hear straight from **Fabio, Alessandro, or Hakan**? Looking for **recognition stories**, tutorials, or testimonials from people just like you?

It's all here and **it's growing**.

vLife is your space. It's built to be revisited often. A place where you can **learn, share, grow, and even get featured**. Because **your voice matters**. And as this community grows, your story could be the one that inspires someone else to take action.

We've designed **thoughtful categories** to help you explore content that's **easy to share** with your team or prospects. Whether you're just getting started or

vLife is your space. It's built to be revisited often. A place where you can learn, share, grow, and even get featured.

scaling your digital business, vLife is a platform designed to **grow with you** — and showcase the broader mission behind Vyvo's momentum.

After all, there's far more happening than what can fit into a biannual print. Behind every article, feature, and video is a **corporate team, a global community, and a fast-growing ecosystem** committed to pushing boundaries and redefining what's possible.

vLife is now a **platform for innovation, a home for your stories, and a movement you helped build**.

So bookmark it. Visit often. Share the content that resonates with you. Let it **inspire you, challenge you, and connect you** with the people and ideas shaping our future.

Welcome to the vLife Digital hub! Where every page leads to possibility — and **our future is here and always just a click away**.

The Race to 1 Million

Vyvo AI's Global Journey Toward Mass Adoption Led by Our VPs of Market Expansion

By Antonio Pagano, Director of vLife Digital

Six VPs. Six Markets. One Bold Mission.

As Vyvo AI steps out of beta, the race is on. But this is far more than tech for tech's sake. Vyvo AI reshapes lives, routines, and economic opportunity at scale. In this global roundtable, six of Vyvo's strategic and regional leaders reveal how they're driving adoption, trust, and AI-powered transformation across cultures and continents.

Meet the Leaders Expanding Vyvo's Global Footprint.

Tadamasa Shimizu

VP, Japan Market Expansion

A trusted voice in Japan's digital wellness space, Shimizu has been instrumental in aligning Vyvo's AI and wearable tech with Japan's unique cultural emphasis on privacy, precision, and long-term trust.

Lynn Yeh

VP, Chinese Market Expansion

A branding powerhouse, Lynn has led the charge in integrating Vyvo AI into Chinese speaking markets' fast-paced digital ecosystems. Her experience in influencer-led growth and AI-based personalization makes her a key force in Vyvo's rapid regional expansion.

Taylor Worre

VP, North America Market Expansion

Known for his experience in community-driven business models, Taylor is leading Vyvo's push across the U.S. and Canada, focusing on AI-powered lifestyle benefits and the economic potential of SocialFi.

Nithisarin Damsuk

VP, Southeast Asia Market Expansion

A marketing strategist and cultural translator, Nithisarin brings deep understanding of Southeast Asia's mobile-first, community-driven markets. She is shaping how Vyvo speaks to Gen Z, wellness influencers, and micro-entrepreneurs across the region.

Miljan Ubiparipović

VP, Global Market Expansion

As Vyvo's global expansion lead, Miljan builds strategic alignment across all regions. With a focus on infrastructure, community incentives, and adoption strategy, he's guiding the brand's journey from early success to mass-scale breakthrough.

Valeryia Lis

Director of International Community Development

A dynamic force in grassroots growth, Valeryia has been instrumental in building Vyvo's presence in India by empowering local leaders and adapting strategies to the country's vibrant digital culture. Her work is bridging wellness, AI, and opportunity across one of the world's fastest-growing markets.

Q&A

Inside Vyvo's Race to 1 Million with the VPs of Market Expansion

"Our goal isn't just to reach a million subscribers, it's to empower a million lives."

What does the future of Vyvo AI look like in your region over the next 3–5 years?

Shimizu (Japan):

"We're already seeing Vyvo AI resonate with Japan's highly tech-aware but privacy-conscious culture. As the AI becomes more emotionally sensitive and proactive, I see it becoming an essential part of everyday life—especially for health, family, and lifestyle management."

Lynn (Chinese Market):

"We're driving more than just an AI evolution. This is a data sovereignty revolution. Vyvo AI empowers individuals to own and benefit from their own data, completely transforming the way people manage their health and engage with their community."

Taylor (North America):

"In the U.S. and Canada, people want practical utility and passive rewards. Vyvo AI's Life CoPilot model—especially tied to health, scheduling, and even social reminders—is an easy entry point to a smarter lifestyle."

Nithisarin (Southeast Asia):

"The market is mobile-first, highly social, and reward-driven. Our community loves gamified wellness and earning from social connection. Vyvo AI brings those ideas to life in a way that feels natural and fun."

Valeryia (India):

"In India, the future belongs to those who embrace the personal and the local. Vyvo AI is becoming a trusted daily companion for wellness, productivity, and financial empowerment, helping women, students, and self-starters to thrive. Our movement is designed to meet people exactly where they are and help them grow from there."

Miljan (Global):

"Vyvo AI is more than another tech wave; it's a revolution. We are shifting the world from passive digital consumption to empowered digital ownership. And let me be clear: we're not stopping at one million users. We're laying the foundation for the next hundred million. This is the beginning of a global movement."

What's the #1 catalyst for Vyvo adoption: tech, culture, or incentives?

Shimizu:

"Culture. In Japan, the trust factor is everything. We lead with privacy-first messaging and show how AI enhances—not replaces—human connection."

Lynn:

"It's not about a single driver, but a value alignment. In Chinese-speaking markets, practicality, trust, and co-creating value are key. That's exactly what Vyvo embodies—where every user can also be a contributor and a beneficiary."

Taylor:

"In North America, it's value. People are motivated by lifestyle enhancement, not hype. Our messaging is all about control, time-saving, and low-friction rewards."

Nithisarin:

"It's all three here. We package Vyvo AI as smart, fun, and financially beneficial—making it irresistible to social users, especially Gen Z and working professionals."

Valeryia:

"India's vibrant tech-savvy population is uniquely positioned to benefit from Vyvo AI's blend of intelligence and privacy. As we expand in this dynamic region, we see not only early adoption but a genuine hunger for ethical, user-owned AI. Vyvo AI's model empowers individuals across India to take control of their data and transform it into opportunity."

Miljan:

"The real catalyst is trust. People don't follow hype, they follow results. We deliver real outcomes, real use cases, backed by a solid ecosystem that works. That's how you break barriers, that's how you go mainstream. Credibility is the currency of mass adoption."

"The Race to 1 Million Subscribers" is bold. Is it achievable?

Shimizu:

"Absolutely. The tech is ready. The community is primed. Japan will play a key role in the early exponential growth phase."

Lynn:

"This goal is not just a slogan, but the natural outcome of a strategic ecosystem. We've combined core elements such as community influence, user co-creation, and digital sovereignty into a bottom-up movement that's already underway and gaining momentum across multiple markets."

Taylor:

"Achievable? It's inevitable. Because this is not guesswork, it's a coordinated, data-driven strategy. Every single market has its playbook, but they're all aligned to one vision. That's how bold missions turn into historic milestones."

Nithisarin:

"We're activating micro-influencers, community leaders, and wellness coaches. That ripple effect is powerful. We're already building regional momentum."

Valeryia:

"Absolutely. India's scale, speed, and openness to innovation make it one of the most fertile markets in the world for AI adoption. More than merely acquiring users, we are activating communities. When people feel empowered, the numbers follow naturally."

Miljan:

"It's more than possible—it's a coordinated, data-driven effort. Every market has a local playbook, and they're all aligned with global outcomes. As we relentlessly demonstrate the distinct value of Vyvo AI, people will come. Ultimately, it's their AI because they own the infrastructure."

How do we ensure Vyvo AI feels as human as possible in an increasingly AI-driven world?

Shimizu:

"Through empathy. Vyvo AI anticipates, listens, and learns emotionally. That's what makes it feel like a companion."

Lynn:

"Vyvo AI is a digital companion, not a cold, impersonal tool. It proactively understands users' tone, habits, and needs, supporting and empowering them daily from wellness tracking to life management and social interactions."

Taylor:

"People are tired of cold tech. Vyvo AI feels alive. It sends birthday reminders, tracks your stress, and even checks in emotionally. Even better, it's built on their data, so it's their AI! That's the difference."

Nithisarin:

"For us, it's about blending AI with real-life aspirations: better health, stronger communities, more freedom. That's humanity in action."

Valeryia:

"We listen first. In India, emotional connection and human rhythm matter. Vyvo AI must reflect that—learning when to speak, when to suggest, and when to simply support in the background."

Miljan:

"We don't just build technology for people – we build it with people. Vyvo AI learns from the user, adapts to the user, and is shaped by the user. That's our edge in the AI race: humanity at the core, technology as the enabler."

What would you say to someone curious but hesitant to try Vyvo?

Shimizu:

"Start simple. Use the wearable. Let the AI learn. The value will become obvious."

Lynn:

"You've already been generating data value, but for others. Now's the time to reclaim it. This is your AI because you benefit from expanding the market! What other AI platform offers that? Joining Vyvo isn't just about using AI—it's about becoming part of a movement that returns value to its rightful owner: you."

Taylor:

"This isn't about being tech-savvy. It's about living smarter. Vyvo makes that effortless."

Nithisarin:

"Try it for a week. Track your habits. Earn a little. You'll see—it feels like magic, but it's just good design."

Valeryia:

"Start small. Let the system learn you. Most people don't realize how powerful their own data can be until they see it in action. Once they do, they don't want to go back."

Miljan:

"You're stepping into a movement. A movement to take back control of your time, your data, and your digital freedom. This is bigger than tech. It's about rewriting the rules of the digital world, together."

Editor's Final Word

From East to West, Vyvo's vision is both global and deeply local. The race to 1 million isn't just about numbers—it's about people. It's about building a world where every individual has the tools, AI, and community to turn everyday actions into real, lasting value. The future is already here, led by the people shaping it today.

MAKE 2026 YOUR BEST VYVO YEAR YET

Step into a year of
growth, innovation,
and impact.

One of the beautiful aspects of our way of doing business is that, unlike a typical job, you have vast control over your success. Just as liberating, you can define what success means for you, because everyone comes to Vyvo with different dreams and skills. The only comparison that matters is the standard you have set for yourself.

As you plan for 2026, set the bar higher. Define what success means for you, and build a year that moves you and your community closer to greatness.

Are you ready to take your influence to new heights in 2026?

Vyvo is seeking passionate individuals who are ready to lead in the AI, blockchain, and wellness industries. The tips below will help strengthen you and your business and elevate your success in the coming months.

"You define what success means for you, because everyone comes to Vyvo with different dreams and skills. The only comparison that matters is the standard you have set for yourself."

Engage with Your Community

Transform your social media into a platform for change by sharing your experiences with your Vyvo AI Life CoPilot, Vyvo Technology wearables, and the Vyvo SocialFi movement. Enhance your visibility and engagement by using strategic hashtags like #VyvoInfluencer and #FutureMaker. Build a community based on trust and authenticity by actively interacting with your connections.

Tools and Tips to Power Your 2026 Success

Leverage Available Vyvo Resources

Take full advantage of the resources Vyvo offers. Tune into Vyvo SocialFi TV on YouTube for creative content ideas and motivation. Don't forget to visit our Community Resources page for up-to-date tools and information that can elevate your content and keep you informed about the latest in tech and wellness.

Attend Our Signature Events

We can't overstate how important attending events can be in furthering your success. It's in Vyvo's workshops, webinars, and the annual convention that you connect to and interact with our most successful Influencers — not to mention Vyvo Founders and Executives — and learn how to apply their best practices. These are your most valuable opportunities for growth and networking, so make use of them every chance you get!

Get Featured in vLife Magazine

Share your inspiring journey and achievements for a chance to be featured in *vLife Magazine*. This opportunity not only boosts your visibility but also cements your status as a Future Maker within the community.

Share Your Vyvo Journey

Your journey can inspire others. By sharing your testimonials and success stories, you not only enhance your credibility but also have the chance to be featured in Vyvo's global campaigns, encouraging others to realize their potential.

Use the Video Tool to Share

Tools make the job easier, and this one is the perfect introduction to Vyvo SocialFi. Access it from your back office and start sharing!

As you apply these tips to expand your influence and align with a global brand at the forefront of health and technology, 2026 can be a year of unprecedented success for you, and for Vyvo! Maximize your impact as part of the Vyvo movement and help countless others achieve greatness with us!

This is your Vyvo moment — make it extraordinary!

The Fourth Industrial Revolution

From Fifth Avenue to the Future

Antonio Pagano
TechItEasy Super Host and
Director of vLife Digital

In 1903, a photograph taken on New York's Fifth Avenue showed a sea of horse-drawn carriages—and just one automobile. Flash forward to 1913, and the scene had flipped: now only one lonely horse and buggy stood among a flood of Model T Ford. That single decade encapsulated a tectonic shift. It was more than new machinery—it was a new mindset, a new economy, and a new society.

Today, we are living through a similar revolution. But this time, the engines aren't made of steel and oil. They're made of **artificial intelligence** and **blockchain**—the twin pillars of what is being called the **Fourth Industrial Revolution**.

New York City, 1900

New York City, 1913

Making Sense of the Complex

At TechItEasy, our mission is to simplify these transformations so everyone—not just coders or CEOs—can see where the world is going and how to take part in it.

Let's start with this:

Artificial intelligence (AI) is like a super-smart assistant that learns from your behavior, anticipates your needs, and helps you do more with less effort.

Blockchain is a digital ledger that brings trust to the internet—every transaction is verified, secure, and tamper-proof.

Together, these technologies are rewriting the rules of how we live, work, earn, and connect.

The Rise of the AI-Driven Society

AI has come a long way from being a buzzword. Today, **large language models (LLMs)** can generate content, translate languages, and even help you draft business plans. Automation has gone far beyond a “nice to have” to become the backbone of innovation.

Imagine a world where your AI:

- Knows your health needs and gives real-time advice.
- Recommends meals based on your fridge's contents.
- Reminds you not just of your meetings, but of what matters to *you*—from your mood to your long-term goals.

This isn't science fiction. It's the beginning of **Vyvo AI**, the Life CoPilot we're building at **Vyvo**.

The Promise of the Decentralized Future

Now add blockchain into the mix.

At Vyvo, we don't believe your data should be locked away or sold without your consent. We built the **Vyvo Smart Chain (VSC)** to ensure that your data—whether health, habits, or preferences—is owned only by you. This data becomes a valuable asset, stored in your **Data NFT**, and tied directly to your personalized AI.

With our **Vyvo AI** public launch, the Life CoPilot and VSC will work seamlessly together. You'll be able to:

- Create and earn from your own AI-powered data
- Benefit from your participation through SocialFi
- Build a digital life that's both **secure** and **empowering**

Everyone Can Join

The magic of this revolution? You don't need to be a tech expert. At Vyvo, we believe in **inclusive innovation**. Whether you're a student, an entrepreneur, a coach, or just curious—you have a place in this future.

This isn't about owning a factory or writing code. It's about tapping into what you already *do*—move, think, share, and connect—and turning that into value, meaning, and impact.

Our Fifth Avenue Moment

The leap from one Model T in a crowd of horses to one horse in a sea of Model Ts didn't take a century—it took ten years. That's where we are now. On the edge of another flip.

Just as Henry Ford didn't just build cars—he built **access**, **affordability**, and **scale**. We're building the digital equivalent: **Vyvo's platform for data sovereignty, AI empowerment, and community rewards**.

Your Data. Your AI. Your Future.

This is more than tech. It's a movement. It's about taking the power back—from big tech, from opaque systems, from outdated models—and putting it in the hands of the people.

It's time to drive this revolution, and not just watch it happen.

Because the future isn't coming.

It's already here. And it's waiting for you.
